# Taking the hassle out of IT disposal

As your business modernises, disposing of old IT equipment in a secure, cost effective and environmentally responsible way can be a real headache. We handle thousands of computers every year and offer a service that is economically, environmentally and socially sustainable.

## 1 Free Collection Service

**We collect from your location** ensuring your computers are always in our possession and handled carefully. We can pick up when it suits you, at short notice, because we know the last thing you want is your old IT equipment taking up valuable office space.

## 2 Secure Data Destruction

Ok, here is the technical stuff. All equipment collected is erased to the **UK Government's HMG InfoSec 5 Baseline standard** as a minimum. We use the industry standard **White Canyon Wipe Drive Pro** or **Tabernus' CESG** approved erasure software. Data destruction is only carried out by our highly trained and security checked staff.

## 3 Socially Responsible

Once all data has been removed your computers will be made **available to people on low incomes or used in our social inclusion programmes**. Our Digital World programme, for example, helps over 50's who are unfamiliar with computers to search for work online. Our Finding a Way programme helps people with longer term health problems start the process of looking for work again.

## Why choose WASTESAVERS?

- **A personal and helpful service:** We pride ourselves on our staff being helpful and knowledgeable, giving that little extra that makes the difference.
- **No costs:** We collect from you (subject to a reasonable minimum number of units) at a time that is suitable for you. If your items have a disproportionate number of computer monitors we may have to levy a small charge (monitors are counted as hazardous waste).
- **We keep you informed:** We can provide you with comprehensive collection and processing reports at each stage of the process. Each report provides tracked evidence of data destruction and re-use or recycle status of all equipment collected. We can also provide quarterly environmental and social impact reports for you.
- **Environmentally credible:** We are a third sector social enterprise with environmental and social credibility money cannot buy. Recycling with us will improve your green and social credentials when applying for contracts.
- **Reliable:** We've been doing this for more than seven years and our clients include local authorities, government bodies, private companies and members of the public.
- **Fully licenced:** We are a fully licenced IT recycling and re-use company. We can deal with hazardous and non-hazardous waste under the EPA Duty of Care requirements.

## Looking to recycle your other materials?

Call our commercial recycling department.

# IT Recycling Plus

## Not your average waste company

We are a **Third Sector social enterprise** delivering a variety of additional services for our clients who range from local authorities to individual schools. We provide the recycling services on behalf of Newport City Council, collecting from more than 60,000 homes and over 300 local business's every week.

By using us you are directly helping **support our social projects** working in some of the most deprived communities in Wales.

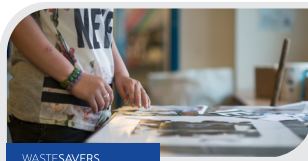

WASTESAVERS

### REUSE

We provide low cost furniture and white goods to people on low incomes through our Reuse outlet in Newport.

The refurbishment process also provides training and work opportunities and experience for long term unemployed.

WASTESAVERS

### PEAK

We provide opportunities for young people finding it difficult in mainstream education, giving them practical experience and skills ranging from carpentry and bike repair to cooking and plumbing.

WASTESAVERS

### TRAINING

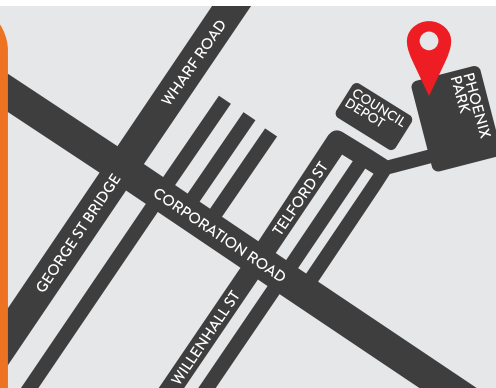

**We run accredited training in:**

- Shea Safety Card Certification Scheme
- Microsoft Office
- Facilities Management
- Recycling And Waste Management
- Environmental Awareness
